

Shubhankar Thapliyal

Technical Lead

📞 +91-9760624933 ✉ shubhankar.thapliyal@gmail.com 📍 New Delhi, India 🗓 8 Years of experience

DevOps Engineer with over 8 years of experience designing and delivering cloud-agnostic solutions across Azure and AWS. Skilled in building CI/CD pipelines (Azure DevOps, GitHub, GitLab), automating infrastructure provisioning with Terraform and Ansible, and implementing containerization using Docker and Kubernetes. Experienced in configuration management, monitoring (Azure Monitor, App Insights, CloudWatch), scripting with Bash and PowerShell, and improving deployment velocity and reliability through automation and best practices. Proven collaborator driving governance, security, and operational excellence.

KEY SKILLS

✓ Azure DevOps ✓ GitHub ✓ GitLab ✓ Terraform ✓ Ansible ✓ Docker ✓ Kubernetes ✓ AWS ✓ Azure ✓ CI/CD

✓ Bash ✓ PowerShell ✓ Linux ✓ MySQL ✓ MongoDB

Microsoft Certified: Azure Fundamentals
Python For Everybody

WORK EXPERIENCE

Technical Lead
Wipro

Aug 2025 - Present

- Designed and engineered enterprise-grade Ansible shared roles to standardise configuration management across AWS and Azure environments.
- Managed end-to-end infrastructure lifecycle using Terraform, improving deployment speed by 35%.
- Leveraged GitLab CI/CD pipelines to automate continuous testing and deployment of automation assets for hybrid cloud infrastructures.
- Maintained and enhanced a GenAI-powered Ansible Generator platform used enterprise-wide to automate creation of Ansible playbooks and roles, accelerating automation delivery and ensuring compliance with organisational standards.
- Acted as Level 3 escalation point, providing expert troubleshooting and on-call support for complex production issues, reducing resolution time by 25%.

DevOps Engineer
AAPC

May 2021 - Aug 2025

- Designed and implemented robust CI/CD pipelines using Azure DevOps and GitHub, enhancing software release efficiency and deployment speed.
- Automated infrastructure provisioning with Terraform and managed configurations using Ansible across Azure and AWS cloud environments.
- Deployed Docker containerization and orchestrated Kubernetes clusters to enable scalable and resilient application delivery.
- Built secure, cost-effective, and high-performing cloud environments leveraging Microsoft Azure and AWS services.
- Developed Bash and PowerShell automation scripts to minimize manual tasks and streamline software delivery workflows.
- Administered Linux systems, virtualization platforms, databases, and cloud infrastructure to ensure optimal performance and stability.
- Implemented proactive monitoring, load balancing, and performance tuning strategies to maintain high availability and reliability.
- Collaborated with cross-functional engineering teams to automate SDLC processes, accelerating development cycles and delivery cadence.

Networking Sales Engineer
Mindtree Limited

Apr 2018 - May 2021

- Implemented ITIL procedures for incident, change, and service management while supporting Azure and AWS cloud platforms.
- Contributed to Azure DevOps Engineering Operations and supported ASI Azure projects including Data Bridge, Data Lab, and FMC environments.
- Developed automation scripts using Python and Shell to improve operational efficiency.

- Worked with SQL and MongoDB for data handling and integration tasks.
- Analyzed systems and recommended process improvements; coordinated with project teams to implement enhancements.

PROJECTS

Ansible Playbook Generator | US Bank

12 Months

- Led the development of an AI-powered Ansible Playbook Generator utilizing Python, LangGraph, Node.js, and generative AI to automate infrastructure provisioning and configuration management.
- Designed a dynamic engine that translates system requirements into optimized, reusable Ansible playbooks while managing role dependencies, validations, and error handling autonomously.
- Integrated the platform with GitLab CI/CD pipelines and enterprise security protocols to ensure automated testing, version control, and compliance governance.
- **Reduced manual scripting efforts by 60%, enhanced deployment accuracy by 45%, and accelerated delivery cycles by 35%.**
- Introduced self-service automation through reusable templates and intelligent recommendations, boosting operational efficiency, scalability, and infrastructure resilience.

Ansible Automation Team | US Bank

16 Months

- Led enterprise automation initiatives to standardize infrastructure and application deployment across engineering teams.
- Designed and implemented a centralized Ansible shared-role repository, enhancing reusability, governance, and consistency.
- Developed modular playbooks and roles for provisioning, patching, configuration management, and deployment automation, **reducing manual effort by 40% and accelerating deployment speed by 35%.**
- Integrated automation workflows into GitLab CI/CD pipelines, boosting reliability, compliance, and operational efficiency.
- Collaborated with cross-functional teams to optimize delivery processes and establish a scalable automation framework for enterprise-wide infrastructure operations.

Novel Approaches for Data Transmission in Financial Institutions

24 Months

- Designed and proposed a scalable cloud-native data transmission framework for financial institutions using Apache Airflow and Azure Data Factory.
- Developed automated data pipelines for secure ingestion, transformation, validation, and distribution of financial data across enterprise platforms.
- Implemented workflow orchestration, dependency management, scheduling, and monitoring capabilities to improve data reliability and operational efficiency.

ASI-CSP Azure T&M / ASI Data Bridge T&M / Azure Data Lab Support FMC | Aberdeen Standard Investments

23 Months

- Provided cloud operations and platform support for the Central Services Platform responsible for enterprise-wide data movement across multiple applications.
- Managed Azure services, Microsoft SQL Server environments, and Azure DevOps processes to maintain platform stability and performance.
- Conducted health assessments for 24+ applications, identifying operational risks and implementing proactive improvements that enhanced service reliability.

Implementing DevOps Pipelines on Azure DevOps for Java and Python Repositories

2 Months

- Designed and implemented end-to-end CI/CD pipelines in Azure DevOps for Java and Python applications.
- Utilized Azure Repos for source control and developed deployment workflows using Classic Release Pipelines and YAML.
- Worked with Azure App Services, deployment slots, and both Microsoft-hosted and self-hosted agent pools to improve deployment consistency and automation maturity.

CI/CD Automation for PHP Web Application Using Jenkins and Docker

1 Months

- Developed and implemented an automated CI/CD pipeline for a PHP web application leveraging Jenkins, GitHub, and Docker.
- Integrated GitHub repositories with Jenkins to enable automatic build triggers and continuous integration workflows upon each code commit.
- Configured pipelines to perform code validation, build execution, unit testing, artifact packaging, and deployment automation.
- Implemented Cobertura code coverage reporting to enhance visibility and tracking of code quality metrics.
- Automated application deployment using Docker containerization, ensuring consistent, scalable, and repeatable releases across multiple environments.

MS VSO Engineering Operations | Microsoft

10 Months

- Delivered 24x7 operational support for Azure DevOps Services (VSTS/VSO), ensuring continuous service availability and swift incident resolution.
- Led coordination of bridge calls during critical incidents, managing incident lifecycle including root cause analysis and problem

management to minimize recurrence.

- Maintained clear and consistent stakeholder communications and conducted thorough post-incident reviews.
- Updated and managed comprehensive service documentation to enhance operational transparency.

EDUCATION

M.A | Political Science

2025

Indira Gandhi National Open University (IGNOU), Delhi

Marks - 61%

B.Tech / B.E. | Electronics

2017

University of Petroleum and Energy Studies, Dehradun

12th

2013

CBSE, English

Marks - 82%

10th

2011

CBSE, English

Marks - 82%

EXTRA-CURRICULAR ACTIVITIES

Technical Blogging

Authored and shared articles/tutorials on DevOps practices, automation scripting, and cloud infrastructure best practices.

ACHIEVEMENTS

Technical Blogging

Authored and shared articles/tutorials on DevOps practices, automation scripting, and cloud infrastructure best practices.

ADDITIONAL INFORMATION

Hobbies: Reading Technical Books, Horology, Motorcycle Restoration

Languages: English Hindi
